PAMUKKALE

The name Pamukkale means "cotton castle". Pamukkale's terraces are made of travertine, a sedimentary rock deposited by mineral water from the hot springs. In this area, there are 17 hot springs with temperatures ranging from 35 °C (95 °F) to 100 °C (212 °F), the world.

Visit Aphrodisias, the ancient Roman city built in the 3rd century BC to honor the Goddess Aphrodite, after whom the city was named.

Pamukkale is recognized as a World Heritage Site together with Hierapolis, the ancient site used as a healing center, a thermal spa early in the 2nd century BC.

Enjoy exploring travertines and swimming with Roman ruins in the large natural swimming pool at Hierapolis.

There are plenty of beauties that could not fit into this page.

Join our tour to witness the natural wonders of Pamukkale.
